Assignment 5 - Report & Presentation

TW Lab 2025

Q1. Create a LaTeX document using the `report` class with font size 12pt, A4 paper and page margins set to $\sim$ 1 inch on all sides.

(a) Create a title page that includes the title ``` ``Introduction to LaTeX'' ```, your name, your id, today's date, the names of your course and course instructor. Format the title in bold and `Huge`, and your name in `Large`.

(b) Add an abstract to your document. The abstract should briefly describe what this document is about. Then start your main text with a section titled `Introduction`.

(c) Add few chapters. Use the `sectsty` package to change all chapter titles to red, bold, and huge, section titles to magenta, italic, and large. Subsection titles should appear in orange.

(d) First page should not have any headers/footers. From the second page onwards, add a header with your name (left), the course title (center), and the current date (right).

Q2. Create a short Beamer presentation supporting the above document (3–4 slides) with a title slide introducing your presentation, 1–2 content slides, and a concluding slide.
